The SPICE Framework Application Bundles

Four 'Bundles' for Any Business

Integrated Resources for Performance & Development

Connecting performance management to people development and people performance.

Simple, accessible resources available on demand, anywhere to support businesses and their people.

The SPICE Framework applications are organised in four 'bundles' to suit the needs of different users. Within each bundle, businesses have access to all SPICE Framework applications on any web-enabled device.

Developed in line with global trends, the SPICE Framework puts into the hands of any business its complete range of simple, accessible and affordable tools to support performance and development.

SPICE Personal

A resource for the development of individual users

FREE

SPICE Personal is a free service for any individual user

The individual user may access the SPICE Framework to address their personal development.

SPICE Tailored allows for the software to be customised, branded, developed and potentially licensed to businesses.

SPICE Tailored

Customised resources for the management, training and development of people and organisations

Price on Application

SPICE Tailored can be developed and branded as required
